

How to register the missing OCX files?

Sometimes the installation procedure is not able to register some OCX files under Win 7 op. system (Win 8 seems to be less problematic).

It can be solved by a simple, two-step procedure using administrator rights.

1) Copy from the installation package the missing file (e.g. GRID32.OCX) into the directory:

`c:\Windows\System32\`

2) Start "All Programs ... Accessories ... Command prompt" and type:

`regsvr32 C:\Windows\grid32.ocx (OR OTHER OCX OR DLL FILE NAME)`

```
Administrator: Command Prompt
Microsoft Windows [Version 6.1.7601]
Copyright (c) 2009 Microsoft Corporation. All rights reserved.

C:\Users\dunkl-admin>cd..
C:\Users>cd..
C:\>regsvr32 C:\Windows\System32\GRID32.OCX
```

Press Enter and ready
